

## and fresh air

The EPA reports that indoor air quality can be 100 times worse than outside air. Airborne pollutants may include:

- Dust, pollen, dirt, dander, mold spores, dust mites, viruses, fungi and bacteria.
- Gases, vapors and odors from cooking, furniture glues and finishes, cleaning products and more.

## control

Too Little Humidity...

- Can cause static shock, dry skin and sinus irritation.
- Can crack woodwork.
- Makes you feel colder.

Too Much Humidity...

- Makes you feel sticky.
- Increases allergens.
- Causes wood warping and wallpaper peeling.

## and energy savings

Heating and cooling is the number one expense in most homes. Improper temperature control can compound the problem. In most homes, a single thermostat is not enough to efficiently keep an entire home comfortable.

## A word about Indoor Air Quality

New heating and cooling systems use up to 50% less energy. Plus, today's homes are constructed "tighter" than ever; allowing less air to be exchanged.

Because of this, now more than ever, today's indoor air quality systems must include temperature control, humidity control, air cleaning and ventilation. Regardless of the age of your system, or if you currently use portables, updating to whole-home solutions could save you time, trouble and a substantial amount on energy costs.

### Why Whole-Home vs. Portables?

Aprilaire whole-home Indoor Air Quality products, unlike portables, are installed as part of your heating/cooling system, providing:

- Greater capacity and protection
- Performance in every room of your home
- Operation in complete silence away from your living area
- Lower maintenance, less mess

## for clean and fresh air

- Aprilaire offers high performance media air cleaners to help keep your home clean and improve the air you breathe by trapping molds, fungus, pollen and respirable dust.
- The Aprilaire Model 5000 electronic air cleaner offers "best in class" performance for relief from allergies and other health issues by removing microscopic spores, bacteria, smoke and other harmful particles.
- Aprilaire controlled ventilation efficiently provides fresh outside air only when needed.

## for humidity control

### Too Much Humidity

- The Aprilaire central dehumidifier Model 1700 works both independently and in conjunction with your central air conditioner to control excess moisture, allowing you to be as comfortable as possible every hour of every day. High capacity, removes 90-120 pints per day.

### Too Little Humidity

- Aprilaire whole-home humidifiers provide proper humidity levels for optimum comfort and protection. Aprilaire automatic humidifiers offer set-it-and-forget-it control to automatically deliver up to 50% more soothing moisture than portables.

## for comfort and energy savings

- Use a programmable thermostat "set-back" strategy to automatically change temperature settings as needed to save energy.
- The ultra-sleek Aprilaire Model 8570 thermostat offers simple programming and easy-to-read, large backlit display.
- Aprilaire Zoned Comfort Control allows you to control the temperature in up to four separate areas of your home to help eliminate hot and cold spots. Control your comfort where you want, when you want.
